

WOW STRONG

FERTILIZER FORMULATED WITH
NATURAL HUMIC ACID

Humic Acid

Pure Organic
Material

Comprehensive
Microbial Group
(PGPR)

FUNCTIONS :

- Rejuvenate The Soil
- Enhances Root Growth & Seedling Vitality
- Enhances Plant Resistance
- Increase Yield & Improve Quality

BENEFITS OF WOW STRONG

WOW STRONG is enriched with humic acid, plant-based organic matter, and beneficial PGPR microbes. It works to revitalize the soil, stimulate strong root development, protect against diseases, and enhance crop productivity.

Key Benefits:

- **Balances Soil pH:** Neutralizes acidity and improves nutrient uptake.
- **Improves Soil Health:** Reduces compaction, restores structure, and enhances water and nutrient retention.
- **Stimulates Root Growth:** Promotes faster root and seedling development, strengthening overall plant growth.
- **Enhances Microbial Activity:** Encourages the proliferation of beneficial microbes in the soil.
- **Strengthens Plant Resilience:** Increases resistance to diseases, drought, flooding, and root rot.
- **Delivers Quality Harvests:** Ensures higher yields with superior crop quality.
- **Enrich with Micronutrients:** Supplies essential and balanced micronutrients.
- **Versatile Application:** Suitable for oil palm, durian, fruit trees, and vegetables.

HUMIC ACID

WOW STRONG uses high-quality humic acid that is fully water-soluble, fast-acting, and highly effective. It enhances nutrient absorption, stimulates root growth, promotes healthier plants, and improves soil condition for superior harvests.

Difference Between Low-Purity Humic Acid and High-Purity Humic Acid

Features	Low-Purity Humic Acid	High-Purity Humic Acid
Solubility & Nutrient Absorption	Low water solubility, with limited absorption by plants	Fully water-soluble, fast-acting, and significantly enhances nutrient effectiveness and absorption rate

APPLICATION OF WOW STRONG

Application Recommendations for WOW STRONG

Type of Crop	Application Rate	Application Method
Oil Palm	4-6 kg / plant / year	• Direct Broadcasting: Evenly spread on the soil surface — simple, fast, and practical. • Recommended to be applied during soil preparation, before sowing or transplanting seedlings. Helps improve soil fertility, enhance soil structure, and provide a strong foundation for plant growth.
Commercial Crops (Suitable for durian, other fruits and vegetables)	±1 kg / m ² (According to crop type and plant age)
